Summary of the Course

Subject area: *International Studies*

The world we live in is complex, with deeply embedded connections between local, national, international and global phenomena. Today we struggle to understand how to manage the effects of people, finance, services and ideas as they flow across borders. This course introduces you to the field of international studies as an interdisciplinary endeavor. We will explore insights gained from geography, economics, anthropology, sociology and politics to better understand the way global flows interact and how they affect countries in both the development and developing world.

Course Learning Outcomes

1) Analyze and critically evaluate debates in international studies from an interdisciplinary perspective;

2) Identify and elaborate on the dynamics and processes that are driving changes to international trade, culture, media, information and politics;

3) Demonstrate familiarity with changes to the structure and form of states, cities and international institutions;

4) Evaluate how these dynamics contribute to changes in citizenship and self-determination, the emergence of conflict and the movement of people across borders;

5) Display effective research and communication skills and be able to apply them in essays, presentations and other forms of assessment

Teaching Strategies

The teaching strategies include 3 hours of lecture and one hour of tutorial time, together with a varied assignment structure.

The lectures will introduce the theoretical material, the contours of changes affecting the world today in broad perspective and the types of specific processes through which these changes occur. This information will be mapped onto actual examples of such changes across the globe. Students will be required to attend lectures, where they will develop effective listening skills, comprehension and effective note-taking.

Tutorials will provide an opportunity to explore these themes in conjunction with assigned reading material. Tutorials allow for the development of oral presentation skills and inter-group dialogue about the issues being explored.
Assignments test the students in a variety of skill sets. An exam will test whether the information has been assimilated, together with critical and analytical thinking skills. The assignments will test the ability to separate core from subsidiary arguments and the ability to craft a coherence thesis and line of argumentation. Group work assignments test team working, lateral thought, application of concepts to actual situations, innovation and both written and oral presentation skills.

### Assessment Details

#### Assessment 1: Essay

**Length:** 2000 Words

**Details:** Students will be required to apply theoretical content that has been learnt in the course by the midterm stage to analyse a contemporary issue. Written feedback will be provided.

**Additional Details:** Please read the Assessment Guide which gives more information about this assignment.

**Turnitin setting:** This assignment is submitted through Turnitin and students do not see Turnitin similarity reports.

#### Assessment 2: Final Examination

**Length:** Not Applicable

**Details:** The written final exam will cover the entire course. Written feedback will be provided. This is the final assessment for attendance purposes.

**Turnitin setting:** This is not a Turnitin Assignment

#### Assessment 3: Tutorial Presentation

**Details:** Students will be required to make a presentation based on the readings that have been assigned and contribute to an "in class problem solving exercise", relating to the readings. Students will facilitate the tutorial once during the semester. Oral and written feedback will be given.
Turnitin setting: This is not a Turnitin Assignment
Attendance Requirements

Attendance of lectures and tutorials is mandatory in this course. Unexcused absence from more than 20% of lectures and tutorials will result in the award of a fail grade.

In lectures and tutorials you will actively engage with core course content, enabling you to attain CLO 2.

Course Schedule

<table>
<thead>
<tr>
<th>Date</th>
<th>Type</th>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 1: 18 February – 22 February</td>
<td>Lecture</td>
<td><strong>Territory &amp; Sovereignty: The Changing face of our Global World</strong></td>
</tr>
<tr>
<td></td>
<td></td>
<td>What we call &quot;globalization&quot; today, is not just a matter of being able to buy a Starbucks coffee or a Big Mac worldwide. Neither is it a matter of the shaping of desire for certain products through access to the Internet and our favourite social media platforms such as Facebook or Instagram. In this lecture we will analyse the drivers that are shaping globalization and the challenges they present to territory and sovereignty across the globe by reshaping time and space.</td>
</tr>
<tr>
<td></td>
<td>Tutorial</td>
<td>Sign up and Parameter Setting</td>
</tr>
<tr>
<td></td>
<td>Group Work</td>
<td>Prep for Week Two Simulation</td>
</tr>
<tr>
<td>Week 2: 25 February – 1 March</td>
<td>Lecture</td>
<td><strong>Do States Matter?</strong></td>
</tr>
<tr>
<td></td>
<td></td>
<td>What does it mean to talk about the state sovereignty in the face of flows of migrants and refugees who are leaving in their thousands to avoid persecution and insecurity in their homelands? Can states claim to control their borders in the face of illegal flows of arms and drugs? What forms of control can be used to regulate cross-border capital flows (legal and illegal), organized crime, the theft of intellectual property and increases in counterfeit goods? In this class we look at some of these issues and ask whether globalization has irrevocably changed the nature and reach of the state.</td>
</tr>
<tr>
<td></td>
<td>Tutorial</td>
<td>Brexit – The Irish Backstop</td>
</tr>
<tr>
<td>Week 3: 4 March – 8 March</td>
<td>Lecture</td>
<td><strong>Populist Politics and the Changing Face of Western Governance</strong></td>
</tr>
<tr>
<td>--------------------------</td>
<td>---------</td>
<td>---------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The last few years have witnessed significant political changes worldwide. Conventional left-right distinctions are no longer able to accurately map the political landscape. Further, a strong antipathy has emerged to elites and their self-serving behaviour. Yet populism, as a political logic defies easy explanation, coming from the left, but also from right and centrist positions. This week we will analyse the emergence of populist leaders such as Trump, Putin, Erdoğan, Le Pen and Bolsonaro.</td>
</tr>
<tr>
<td></td>
<td></td>
<td><strong>Human Trafficking in Libya</strong></td>

</table>

<table>
<thead>
<tr>
<th>Week 4: 11 March – 15 March</th>
<th>Lecture</th>
<th><strong>The Logic of Weak States</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>In recent decades, there has been a seemingly irresistible urge to create taxonomies of states the world over, and to label them as “developed”, “weak” or “failed”. Indices have emerged, ranking states according to various measures of dysfunction, which include: the suspension of law, corruption, poor or non-functioning institutions, economic deterioration, sustained human flight and the removal or reduction of public services. Interventions in Iraq, Afghanistan or Sudan for example, talk of the need to improve governance structures, promote accountability and transparency and to build the capacity of state actors and institutions. Yet, in the vacuums created by weak states and interventions, we have seen the growth of entities such as ISIS. This week we will analyse the logics and forms of legitimacy through which “weak states” operate and ask whether they are amenable to the kinds of intervention that international actors often propose.</td>
</tr>
<tr>
<td></td>
<td></td>
<td><strong>Erdoğan: Reformer or Authoritarian?</strong></td>
</tr>
<tr>
<td></td>
<td>Group Work</td>
<td>Prepare for Week Five Simulation</td>
</tr>
</tbody>
</table>

| Week 5: 18 March – 22 March | Lecture | **Capital Flows and Financial Crises** |
The rise of neoliberal orthodoxy and the ascendancy of the free market from the 1970s appeared to be an unshakeable foundation on which the capitalist system has been built. In this class we will analyse the classical liberal philosophy behind neoliberalism and the major events and technologies that contributed to the growth of capital markets. We will also look at the anatomy of the recent world financial crisis and the role that securitization, collateralized debt obligations (CDOs) and the lack of regulation played in the collapse of banks and investment houses across the globe. Finally we will ask whether things have changed or whether a new shadowy world of investment is emerging.

| Week 6: 25 March – 29 March | Tutorial Simulation | How to Handle a Dictator |
| Week 7: 1 April – 5 April | Group Work | Prepare for Week Seven Simulation |

**Lecture**

**The Political Economy of the North & South**

This week we will analyse the ramifications of the neoliberal project for relations between developed and developing countries. In particular we will look at the way that conditionalities embedded in structural adjustment programs have shaped inequalities across the world. We will also look at the ways that such policies have created relations of dependence based around commodity production and the race for the cheapest products worldwide. As we will see, these policies have had social political and environmental consequences that are very difficult to overcome.

| Tutorial Simulation | Golden Passports: Russian Oligarchs in London |
| Group Work | Prepare for Week Eight Simulation |

**Lecture**

**Land, Commodities and Resource Competition**

The race to acquire resources links an unlikely grouping of financial traders, speculators,
multinational corporations and warlords, who see land and natural resources as the next frontier for wealth accumulation. However, as we have seen throughout this course, whereas capital flows are digital, land acquisition and resource extraction are fixed in space and can only occur in particular places where people live. This week, we look at the geography of resource competition and who is involved in this speculation. We also analyse the impacts that this race is having on indigenous communities worldwide and the ways in which they are starting to fight back.

<table>
<thead>
<tr>
<th>Lecture</th>
<th>Movements of People: IDPs, Refugees and Asylum Seekers.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>According to the UNHCR, 68.5 million people are now forcibly displaced – the highest number since World War II. As the UNHCR points out, forced displacement is not just a humanitarian issue: it has important economic, social, political and environmental impacts, both in the places of origin and destination. This week we will look at the current migration crisis and ask what it means to be a “refugee” an “internally displaced person” (IDP) and an “asylum seeker”. What protections exist in law and from a moral standpoint? We will discuss the geography of displacement and whether alternative solutions might be considered by states and other parties.</td>

Course Evaluation and Development

Courses are periodically reviewed and students’ feedback is used and incorporated to improve
content.

Feedback is gathered from students using myExperience. It is encouraged that students complete
their surveys by accessing the personalised web link via the Moodle course site
Submission of Assessment Tasks

Turnitin Submission

If you encounter a problem when attempting to submit your assignment through Turnitin, please telephone External Support on 9385 3331 or email them on externalteltsupport@unsw.edu.au. Support hours are 8:00am – 10:00pm on weekdays and 9:00am – 5:00pm on weekends (365 days a year). If you are unable to submit your assignment due to a fault with Turnitin you may apply for an extension, but you must retain your ticket number from External Support (along with any other relevant documents) to include as evidence to support your extension application. If you email External Support you will automatically receive a ticket number, but if you telephone you will need to specifically ask for one. Turnitin also provides updates on their system status on Twitter.

Generally, assessment tasks must be submitted electronically via either Turnitin or a Moodle assignment. In instances where this is not possible, it will be stated on your course’s Moodle site with alternative submission details.

For information on how to submit assignments online via Moodle: https://student.unsw.edu.au/howsubmit-assignment-moodle
Academic Honesty and Plagiarism

Plagiarism is using the words or ideas of others and presenting them as your own. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement.

UNSW groups plagiarism into the following categories:

Copying: using the same or very similar words to the original text or idea without acknowledging the source or using quotation marks. This also applies to images, art and design projects, as well as presentations where someone presents another’s ideas or words without credit.

Inappropriate paraphrasing: changing a few words and phrases while mostly retaining the original structure and information without acknowledgement. This also applies in presentations where someone paraphrases another’s ideas or words without credit. It also applies to piecing together quotes and paraphrases into a new whole, without referencing and a student’s own analysis to bring the material together.

Collusion: working with others but passing off the work as a person’s individual work. Collusion also includes providing your work to another student before the due date, or for the purpose of them plagiarising at any time, paying another person to perform an academic task, stealing or acquiring another person’s academic work and copying it, offering to complete another person’s work or seeking payment for completing academic work.

Inappropriate citation: Citing sources which have not been read, without acknowledging the "secondary" source from which knowledge of them has been obtained.

Duplication ("self-plagiarism"): submitting your own work, in whole or in part, where it has previously been prepared or submitted for another assessment or course at UNSW or another university.

Correct referencing practices:

• Paraphrasing, summarising, essay writing and time management
• Appropriate use of and attribution for a range of materials including text, images, formulae and concepts.

Individual assistance is available on request from The Learning Centre (http://www.lc.unsw.edu.au/). Students are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and proper referencing of sources in preparing all assessment items.

UNSW Library also has the ELISE tool available to assist you with your study at UNSW. ELISE is designed to introduce new students to studying at UNSW but it can also be a great refresher during your study.

Completing the ELISE tutorial and quiz will enable you to:

• analyse topics, plan responses and organise research for academic writing and other assessment tasks
• effectively and efficiently find appropriate information sources and evaluate relevance to your needs
• use and manage information effectively to accomplish a specific purpose better manage your time
• understand your rights and responsibilities as a student at UNSW be aware of plagiarism, copyright, UNSW Student Code of Conduct and Acceptable Use of UNSW ICT Resources Policy
• be aware of the standards of behaviour expected of everyone in the UNSW community
• locate services and information about UNSW and UNSW Library

Some of these areas will be familiar to you, others will be new. Gaining a solid understanding of all the related aspects of ELISE will help you make the most of your studies at UNSW.
